What are the Winter World Transplant Games...?

A competition for transplant recipients of all ages (from 9 years)

With competitions in many different disciplines from skiing and snowboarding to cross-country skiing and curling, the Winter World Transplant Games provides challenges and excitement in equal quantities.

Curling and snow-shoeing competitions open to non-skiers!

A live-in camp for transplanted children from 8-15 years

The Nicholas Green Camp is an amazing opportunity for transplanted children to gain confidence and independence, learn to ski or snowboard and discover the mountain environment. Children are fully-supervised 24 hours a day by experienced camp counsellors and qualified nurses, supported by a team of enthusiastic volunteers and translators. A transplant doctor oversees the medical team. Unaccompanied children are welcome and can be collected at Geneva airport. Ski equipment, ski clothing and ski lessons are all provided. The Nicholas Cup slalom race, in memory of Nicholas Green, will take place at the end of the camp and this race is also open to registered accompanying children.

**Nicholas
cup**

An event for the transplant community – recipients, family and friends

Although Anzère offers well-maintained and carefully patrolled pistes to nearly 2'500m, the winter games are not just for skiers and snowboarders. The mountains are a wonderful place to get and to feel "Fit for Life"! Non-skiers will enjoy marked walking and snow-shoeing trails, as well as an ice rink and modern spa and wellness centre. Children are well catered for with a games area and a magic carpet for skiing and tobogganing, right on the village square.

Lift passes, equipment rental and ski and snowboard lessons are all on offer at heavily reduced prices.

Message from Liz Schick

It is an honour for me to have been chosen to lead the organisation of the 10th Winter World Transplant Games in Anzère and Arbaz, Switzerland. Beautiful Anzère has been my home since 1981.

Anzère is already well-known to the transplant community worldwide, having hosted the Nicholas Cup in 2003, the 8th Winter Games in 2012 and the TACKERS camp for transplanted children every year since 2004.

We have a wonderful team preparing for the 2018 winter games and our goal is to make this the largest and most successful winter games ever! Please share the details of the games with your families and friends and help us achieve our goal. We look forward to opening the games with you on 7 January 2018.

Secretary, World Transplant Games Federation

President, Local Organising Committee, WTG 2018

***Extend your stay for 2 additional nights. Accommodation provided FREE for nights of 6 & 12 January.**
